Dear all,

"Success extends beyond mere financial gains; it's about leaving a lasting impact."

Greetings from the GNIOT- Institute of Professional Studies!

It is both a source of pride and immense pleasure to unveil the latest edition of our newsletter, "संवाद". In our earnest pursuit, we have dedicated ourselves to providing a comprehensive and diverse glimpse into the commendable achievements of various departments within our institution.

A college newsletter serves as a reflection of an institution's success story and serves as an invaluable conduit for reaching out to the broader community. It highlights the firm and dedicated efforts of our valued faculty, staff, and students in propelling our institution forward.

We extend our heartfelt congratulations to all for their invaluable contributions to our institution's growth. We also applaud the editorial team for their dedication in bringing this current issue of the newsletter to fruition.

We wish you an enriching and thought-provoking reading experience.

Thank you and warm regards,

DEPARTMENTAL ACTIVITIES

Azadi Ka Amrit Mahotsav : Panch-Pran Ki Shapath (August 09, 2023)

The GNIOT Institute of Professional Studies recently conducted the 'Panch Pran Oath' in accordance with guidelines provided by the Ministry of Culture, Government of India. This solemn pledge was taken during a special ceremony commemorating the seventy-sixth anniversary of India's independence. The initiative was part of the 'Meri Maati Mera Desh' campaign, as outlined in a communication dated August 9, 2023.

During the ceremony, the oath was administered in the presence of the Heads of Departments (HODs) and senior faculty members of the college. As part of this campaign, participants were encouraged to take the 'Panch Pran Oath' and share selfies with soil (Mitti) on the official website www.Merimaatimeradesh.gov.in.

The 'Meri Maati Mera Desh' campaign serves as a significant culmination of the 'Azadi ka Amrit Mahotsav' (AKAM), wherein the GNIOT Institute of Professional Studies paid tribute to the brave individuals who made the

ultimate sacrifice for the nation. AKAM is a nationwide and community-driven initiative aimed at celebrating 76 years of India's independence and the rich history, achievements, and culture of its people.

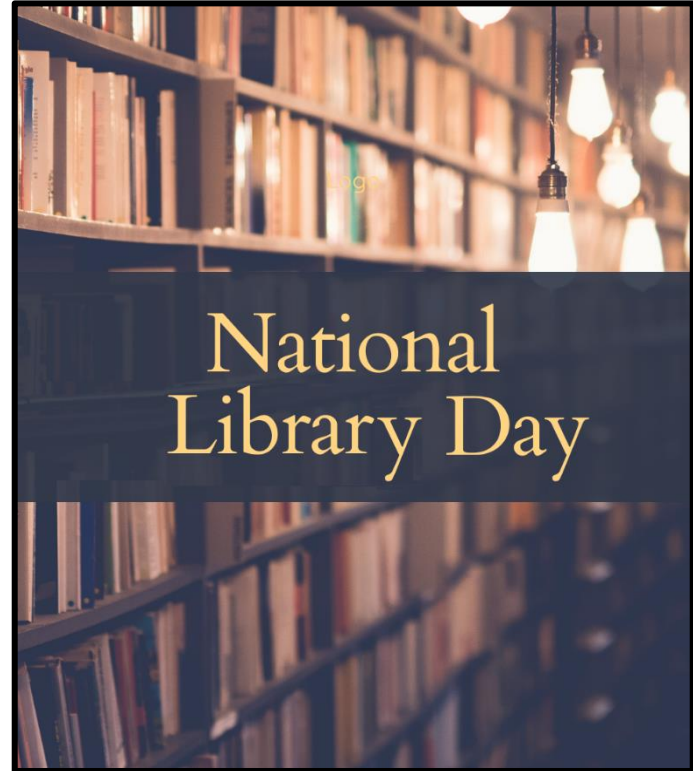

National Library Day (August 12, 2023)

An event commemorating National Library Day took place on Saturday, August 12th, at the GNIOT Institute of Professional Studies. The ceremony commenced with the inauguration by Principal, Prof. Dr. Savita Mohan, alongside Vice President of Project and Planning, Mr. Nitin Mehra. Head Librarian, Mr. S.D. Nautiyal, paid tribute to Dr. SR Ranganathan, the renowned pioneer of library science, by garlanding his portrait.

In his address, S.D. Nautiyal emphasized the significance of August 12th, marking the birth anniversary of Dr. SR Ranganathan. This visionary figure is acknowledged for his pivotal role in transforming the library landscape in India.

Prof. Dr. Savita Mohan, the institute's Principal, underscored the vital role of libraries and encouraged all attendees to cultivate a reading habit within the library. She also commended the dedicated library staff for their exemplary service.

Mr. Nitin Mehra, Vice President of Project and Planning, stressed the library's pivotal role as an integral part of any institution, highlighting its potential to empower readers and brighten their futures. He called upon everyone to make optimal use of the library's resources. The event witnessed the presence of numerous staff members from the institute and the library, making it a memorable celebration of National Library Day.

Independence Day Celebration (August 15, 2023)

“Grateful for freedom, Proud of our nation, United we stand, Divided we fall, Independence Day unites us as Indians.”

Independence Day holds significance beyond merely raising our national flag and relishing a day of leisure. It stands as a reminder of the sacrifices undertaken by our ancestors to secure the liberty of our cherished nation. Today, the GNIOT Institute of Professional Studies commemorated this significant event. The occasion commenced with a ceremonial lighting of the lamp, a symbol of auspiciousness, and was followed by an inspiring speech delivered by Principal Dr. Savita Mohan. In her address, she emphasized the importance of paying tribute and showing reverence to the valiant freedom fighters who dedicated their lives to secure India's independence. The proceedings were enriched by captivating performances, including melodious singing, graceful dancing, and a fervent patriotic speech, all presented by the talented students of GIPS.

As we observe this day, let us pay homage to the selfless soldiers who exhibited unvacillating courage in safeguarding our nation and bestowing upon us the precious gift of freedom.

GNIOT GROUP OF INSTITUTES
VOL 2 ISSUE 7 || AUGUST 2023

Sadak Suraksha Pakhwada (August 18, 2023)

"Sadak Suraksha Pakhwada" stands as a proactive initiative introduced by CCS University, with the core objective of elevating awareness and adherence to road safety norms across India. This campaign acts as a potent reminder, targeting both motorists and pedestrians, urging them to shoulder the responsibility of curbing road accidents and nurturing a more secure road milieu.

During the initiative, an array of activities unfolded, encompassing student and faculty awareness programs, the creation of informative posters, the fervent "Sadak Suraksha Rally," and more. These endeavors transpired within the precincts of the GNIOT Institute of Professional Studies campus.

The crux of the "Sadak Suraksha Pakhwada" was realized through an enhanced public consciousness concerning road safety concerns.

The multifaceted awareness campaigns, spanning student and faculty engagement, poster crafting, and spirited rallies, collectively contributed to this endeavor. Consequently, the populace garnered heightened insight into the indispensability of adhering to traffic regulations, embracing helmet usage, seat belt enforcement, and other pivotal safe conduct principles on the road.

Hariyali Teej (August 19, 2023)

"A day to embrace our rich traditions and welcome the blessings of the monsoon season."

The GNIOT Institute of Professional Studies came alive with vibrant celebrations of this colorful festival, radiating with boundless energy and enthusiasm. The esteemed presence of Principal Prof. Dr. Savita Mohan added an extra spark to the festivities.

The day witnessed a delightful array of performances and engaging games, all gracefully executed by our beautiful and brilliant ladies. Let's take a moment to celebrate their accomplishments:

Ms. Teej - Dr. Ankita Shukla
Ms. Fashionista - Dr. Ankita Shukla
Ms. Pro Dancer - Ms. Harpreet Kaur
Ms. Nightingale - Ms. Medha Asthana

The success of this wonderful event was made possible by the tireless efforts of our cultural club and the enthusiastic participation of our esteemed faculty members.

Your dedication has truly made this event a monumental success. Heartfelt gratitude for all your hard work. As the flowers bloom in the gardens and the scent of rain fills the air, we extend our warm wishes to all of you on this beautiful occasion of Hariyali Teej!

VOL 2 ISSUE 7 || AUGUST 2023

Quiz Competition on India Space Week (August 21, 2023)

GNIOT Institute of Professional Studies (GIPS) organises a Quiz Competition on “India Space Week”. The objective of the event is to spread awareness among the students of colleges and universities about the recent space advancement in India and the world. India is celebrating India Space Week between 12-18 August 2023 to mark the celebration of the birth of the father of the Indian Space program Vikram Sarabhai. GNIOT Institute of Professional Studies and the event was a great success.

The total number of students were divided into 4 groups. Students participated enthusiastically. A total of 20 questions were asked in the competition. Group D emerged as the winner. Group A and B come up as first and second runners up respectively. It was great to see the awareness among the students regarding space advancement in India and the world. We appreciate the initiative taken by the government, the support received from the management and Principal Madam Dr. Savita Mohan, the faculty members, and the number of participants from the students.

Various activities are performed in the presence of all faculties and students. The students have shown great interest and have emerged with their knowledge of the recent advancements in space and technology.

FACULTY CORNER

EMBRACING THE FUTURE: HOW AI WILL TRANSFORM THE EDUCATION INDUSTRY

In the fast-paced world of technology, Artificial Intelligence (AI) is emerging as a powerful force that is set to revolutionize various sectors, including education. As we stand on the cusp of a new era, it's crucial to understand

how AI is poised to reshape the landscape of learning and teaching.

1. Personalized Learning:

One of the most exciting prospects of AI in education is its ability to personalize the learning experience. With AI-driven algorithms, educators can tailor content and pace to suit individual student needs. This fosters a more inclusive and effective learning environment where students can excel at their speed.

2. Enhanced Engagement:

AI can engage students on a deeper level. Virtual tutors and chatbots can provide instant feedback, answer queries, and even offer emotional support. Interactive AI-driven content, such as gamified lessons and simulations, can make learning more engaging and enjoyable.

3. Data-Driven Insights:

AI enables the collection and analysis of vast amounts of data on student performance. Educators can use this data to identify areas where students struggle and provide targeted interventions. Predictive analytics can also help institutions identify at-risk students and intervene early.

4. Efficient Administrative Tasks:

Administrative tasks like grading and scheduling can be time-consuming. AI can automate these processes, freeing up educators to focus on teaching. This efficiency can lead to cost savings and improved resource allocation.

5. Access to Quality Education:

AI can bridge geographical and economic divides in education. Online courses powered by AI can make high-quality education accessible to a global audience, leveling the playing field for students worldwide.

6. Lifelong Learning:

In a rapidly evolving job market, lifelong learning is essential. AI can help create personalized learning pathways for professionals, enabling them to upskill and adapt to changing demands.

However, while AI holds immense promise, it also raises important questions about ethics, privacy, and equitable access. Striking the right balance between technology and human interaction will be crucial.

Educators and institutions must adapt to these changes by embracing AI as a valuable tool in the educational toolkit. Training for educators and robust cybersecurity measures will be essential to harness AI's potential safely and effectively.

In conclusion, AI's impact on the education industry will be profound, offering exciting opportunities to enhance learning, engagement, and accessibility. As we navigate this transformative journey, it is essential to approach AI integration with thoughtful consideration and an unwavering commitment to quality education for all. Embracing AI with open minds and a commitment to ethical use will help us shape a brighter future for education.

(Assistant Professor)
Department of Commerce

BLOCKCHAIN IN A NUTSHELL

Blockchain is the backbone technology of the revolutionary digital cryptocurrency Bitcoin. In January 2009, Satoshi Nakamoto first set the Bitcoin Blockchain into motion. He has brought into use radical and untested concepts at the same time.

Bitcoin is a decentralized and peer-to-peer online Cryptocurrency that allows online payments to be sent without going through a central issuer.

Blockchain could be thought of as a data structure that could be a growing list of information blocks. Blockchain is a shared, immutable ledger that facilitates the process of recording transactions and tracking assets in a business network. The core technology of Bitcoin cryptocurrency has become a blessing for human beings in this era as everything is gradually changing to digitization in today's epoch. Bitcoin creates virtual money using blockchain which has become popular all over the world. Blockchain is a shared public ledger, and it includes all transactions that are confirmed. It is almost impossible to crack the hidden information in the blocks of the Blockchain. However, there are certain security and technical challenges like scalability, privacy leakage, selfish mining, etc. which hampers the wide application of Blockchain. The distributed nature of Blockchain allows all participants of Blockchain to have equal control of the system without any trusted third-party control.

Key elements of a blockchain are a distributed ledger, immutable records, and smart contracts. In this technology, all network participants have access to the distributed ledger. No participant can change or tamper with a transaction after it's been recorded in the shared ledger. To speed up transactions, a set of rules called smart contracts are stored on the blockchain that run automatically when predefined conditions are met.

With blockchain, as a member of a members-only network, you can rest assured that you are receiving

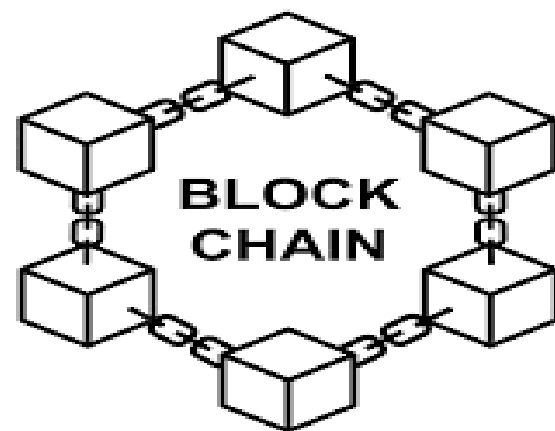

accurate and timely data and that your confidential blockchain records will be shared only with network members to whom you have specifically granted access.

Thus provides greater trust. Also, consensus on data accuracy is required from all network members, and all validated transactions are immutable because they are recorded permanently. No one, not even a system administrator, can delete a transaction. Thus provides greater security.

Blockchain is important as business runs on information. The faster it is received and the more accurate it is, the better. Blockchain is ideal for delivering that information because it provides immediate, shared, and completely transparent information stored on an immutable ledger that can be accessed only by permissioned network members. Virtually anything of value can be tracked and traded on a blockchain network, reducing risk and cutting costs for all involved whether it is a tangible asset e.g. a house, car, cash, land, or intangible assets e.g. intellectual property, patents, copyrights, branding. Since in blockchain technology, members share a single view of the truth, you can see all the details of a transaction end to end, giving you greater confidence, as well as new efficiencies and opportunities.

WELCOME TO TEAM GIPS

Ms. Rashi Tanwar (Assistant Professor – BCA)

Ms. Rashi Tanwar has joined as an Assistant Professor in the Department of Computer Application (BCA). She is B.Tech., M.Tech. UGC-NET & GATE. She has more than 3 years of teaching experience in academics and 2 years experience in industry. She is also pursuing Ph.D. She has attended National & International Seminars. She has also published research papers in various journals.

Mr. Gourav (Assistant Professor – B.com.)

Mr. Gourav has joined as Assistant Professor in the department of Commerce. He is M.Sc. In Mathematics, UGC-NET & GATE. He has more than one year of experience. His role encompasses developing curriculum, delivering engaging lectures, mentoring students, and actively participating in academic committees. His core interest areas are financial accounting, cost accounting, and corporate accounting subjects.

Ms. Sakshi Srivastava (Assistant Professor – BCA)

Ms. Sakshi Srivastava has joined as an Assistant Professor in the department of Computer Application (BCA). She is BCA, MCA from R.G.P.V. University (M.P) & pursuing M.Tech from G.L. Bajaj, Greater Noida. She has more than 3 years of teaching experience in academics. She has attended several national and international seminars and conferences. She has also published research papers in national and international journals.

Mr. Sachin Kumar (Assistant Professor – BCA)

Mr. Sachin Kumar has recently become a part of GIPS in the department of BCA. He is BCA And MCA. He has more than one year teaching experience. He has 6 months of experience in industry also. He has attended many national and international seminars and conferences. He has published research papers in various journals of repute.

STUDENT'S CORNER

INTERNET OF THINGS (IOT)

IoT stands for Internet of Things. IoT is a network of interconnected computing devices that are embedded in everyday objects, enabling them to send and receive data. It is a network of interrelated devices that connect and exchange data with other IoT devices and the cloud. It refers to the interconne-

-ctedness of physical devices, such as appliances and vehicles, that are embedded with software, sensors, and connectivity which enables these objects to connect and exchange data. This technology allows for the collection and sharing of data from a vast network of devices, creating opportunities for more efficient and automated systems. Most of the connected devices will have an internet protocol (IP) address, with IPv6, billions of devices can be connected with ease.

Things that can be connected with IoT are homes (Interlinking of household appliances.), wearables (smartphones, smartwatches, fitness bands, etc.), cars (vehicles connected to the network.), cities (Smart meters that can analyze the uses of gas, water, electricity, etc, connected traffic signals, smart bins, etc.). for this purpose, different network can be connected like BAN (Body area network): wearable, LAN (Local Area Network): smart homes, WAN (Wide Area Network): connected cars, VWAN (Very Wide Area Network): smart cities.

IoT can be used to do small tasks in daily life such as coffee-making as soon as the owner of the house returns home, refrigerator indicating that vegetables need to be bought and/or ordering them automatically from the e-store, etc. It can also be used in offices. It reduces human error, increases efficiency, improves productivity, etc. IoT can be used for many more fields like agriculture, healthcare, transportation, media/advertising, etc.

IoT can be used to make cities better places to live.

It can be applied in solid waste management, smart power grids, smart energy management systems, etc. to make a smart city.

Internet of Things challenges will be loss of jobs because of the replacement of humans with machines. Safety and privacy is a challenge in this domain. Digital surveillance also poses a threat with smart homes being susceptible to privacy invasions. Further, there is also the problem of bank accounts being hacked, ransomware attacks, etc.

Sadaf

B.Sc. (CS) – III Sem.

COLLEGE STUDENTS AND THEIR THRIVING SOCIAL LIVES

The college experience is a transformative journey, encompassing academic growth, personal development, and the forging of lifelong friendships. One of the most exciting aspects of this journey is the social life of college students,

which plays a pivotal role in shaping their overall experience. In this article, we delve into the multifaceted world of social interactions on campus, highlighting the importance of balance, diversity, and personal growth.

Building Friendships:

College is a melting pot of diverse individuals from various backgrounds and cultures. It provides an exceptional opportunity to make friends with people you might never have crossed paths with otherwise. Engaging in clubs, and student organizations, and participating in campus events are great ways to initiate friendships. Don't be afraid to step out of your comfort zone and introduce yourself to new faces.

Balancing Academics and Social Life:

Striking the right balance between academics and social life can be challenging but is crucial for personal growth. While maintaining good grades is important, it's equally essential to invest time in building relationships. Study groups, collaborative projects, and shared learning experiences can bridge the gap between these two aspects of college life.

Exploring Diversity:

Embrace the diversity that college offers. Interact with people from different backgrounds, engage in discussions, and broaden your horizons. Learning from others with unique perspectives is an enriching experience that helps you become a more empathetic and open-minded individual.

Campus Events and Traditions:

Many colleges organize a plethora of events and

traditions that celebrate the institution's culture and foster a sense of community. Participating in these activities not only provides opportunities for fun and relaxation but also helps you feel more connected to your college and its history.

Mental Health and Well-being:

Social life can be exhilarating but also demanding at times. It's essential to prioritize your mental health and well-being. Seek support from campus resources, friends, or professionals if you ever feel overwhelmed or anxious about your social life or any other aspect of college.

Leadership and Personal Growth:

Getting involved in leadership roles within student organizations or clubs can be a transformative experience. It allows you to develop crucial skills such as communication, teamwork, and problem-solving. These experiences not only enhance your resume but also contribute to your personal growth.

Networking Opportunities:

College is a prime time to start building your professional network. Attend career fairs, workshops, and conferences to connect with professors, alumni, and potential employers. Your social interactions today can lead to valuable opportunities tomorrow.

In conclusion, college social life is a vibrant tapestry of experiences, offering students a chance to grow academically, personally, and socially. It's a journey filled with excitement, challenges, and invaluable memories. Embrace the diversity, make lasting connections, and prioritize your well-being to make the most of your college years.

Remember, your social experiences in college are not just about having fun; they are about becoming a more well-rounded and compassionate individual. So, go out there, engage with the world around you, and make your college years truly unforgettable.
