Dear all,

"Success is not measured by what you accomplish, but by the opposition you have encountered and the courage with which you have maintained the struggle against overwhelming odds."

Greetings from the Greater Noida Institute of Professional Studies!

We are thrilled to present our readers with the latest issue of 'संवाद'. At Greater Noida Institute of Professional Studies, we harbor a grand vision of creating an educational temple par excellence, and we have achieved considerable success in this endeavor. Our dedication lies in nurturing professionally inclined graduates who will emerge as powerful performers in the practical world. In essence, we strive for excellence in the realm of education.

This newsletter serves as a platform for students and faculty alike, allowing them to share their knowledge and express their artistic talents. It is a canvas of creative liberty, showcasing the budding professionals' expressions and experiences, aimed at bridging the gap between theoretical knowledge and practical exposure.

We sincerely thank you for sparing your valuable time to appreciate our achievements. Wishing you a delightful and thought-provoking reading experience.

Thank you and best regards

DEPARTMENTAL ACTIVITIES

Awareness Campaign on World Environment Day (June 05, 2023)

“The environment is where we all meet; where we all have a mutual interest; it is the one thing all of us share.”

On June 5th, 2023, GNIOT Institute of Professional Studies, in collaboration with the IIC Club, organized a celebration of World Environment Day at GIPS to raise awareness among students about the importance of environmental protection. The event served as a platform to address a range of critical issues that pose adverse effects on the environment, including but not limited to global warming, overpopulation, pollution, and crimes against wildlife.

Students of GIPS have conducted an awareness campaign in which attractive posters and stickers are being used to spread awareness among the youth to save the environment. They focused on inducing small initiatives to protect energy conservation at GIPS. Energy Conservation has become the need of the hour in our day-to-day life. Be it lights, fans, televisions, or vehicles on roads, each and everything requires energy.

To extend the awareness, students have also prepared a presentation emphasizing the various types of energy and the sources through which energy can be conserved.

Under the esteemed guidance of our honorable Principal, Prof. Dr. Savita Mohan, this awareness drive is being conducted. Her profound expertise and leadership have been instrumental in organizing and directing this initiative to raise awareness about the importance of environmental preservation.

Yoga Day (June 21, 2023)

The Yoga Day Celebration was held with the aim of promoting physical and mental well-being among students, faculty, and staff. The celebration provided an opportunity for participants to engage in various yoga activities and learn about the benefits of yoga. The event was inaugurated by the principal Prof. Dr. Savita Mohan, who delivered an inspiring speech on the importance of yoga in maintaining a healthy lifestyle. She emphasized the benefits of incorporating yoga into daily routines and its positive impact on physical and mental well-being. The main highlight of the event was the series of yoga sessions conducted by faculty members. Participants were guided through different asanas (poses) and pranayama (breathing exercises) to improve flexibility, strength, and mindfulness. In addition to yoga asanas, meditation, and mindfulness exercises were incorporated into the program. Participants were introduced to techniques for calming the mind, improving focus, and finding inner peace. The session provided a serene environment for individuals to relax and rejuvenate.

The Yoga Day Celebration was a resounding success, promoting physical fitness, mental well-being, and cultural awareness among participants. The event fostered a sense of community and encouraged individuals to embrace yoga as a way of life. By organizing events like these, GIPS remains committed to nurturing a healthy and balanced academic environment, empowering individuals to lead fulfilling lives both academically and personally

Visit to India TV in Aap Ki Adalat (July 08, 2023)

GIPS organized a visit to India TV on 8th July 2023. The objective was to guide our students on various aspects of the Media industry. It was a great and constructive learning platform for students. The session was targeted at the B.Com. students. It was a great and constructive learning platform for students. Students took part in the shoot for the renowned show Aapki Adalat. The guest of the day was Versatile singer, Actor, and Parliament member Mr. Manoj Tiwari. The show was hosted by the famous Journalist and Anchor Mr. Rajat Sharma. Students witnessed the management, and process of organizing the event. Students also took part in the discussion on various questions with Mr. Manoj Tiwari and Mr. Rajat Sharma. The aim of giving such exposure to students was to show them a glimpse of TV and Entertainment. Furthermore, to sensitize them to be part of the media. The visit was organized under the guidance of Dr. Savita Mohan (Principal, GIPS). It was a great and constructive learning platform for students.

Visit to India TV in Aap Ki Adalat (July 14, 2023)

GNIOT Institute of Professional Studies orchestrated an extraordinary opportunity for its BBA students on the 14th of July 2023. The institute organized a visit to participate in the TV show, "Aap Ki Adalat." Hosted by the renowned TV personality, Padmashree Rajat Sharma, the show welcomed the honorable Governor of Kerala, Arif Mohammad Khan, as a special guest.

The BBA students' participation in "Aap Ki Adalat" proved to be a memorable and impactful experience for the participants and the viewers. The show centered around engaging debates on various contemporary political, economic, and social issues. Equipped with their knowledge of business administration and a keen interest in current affairs, the students passionately expressed their viewpoints and actively participated in a constructive dialogue with the esteemed guests.

This platform served as a national stage for the BBA students to showcase their knowledge, and critical thinking abilities, and articulate their thoughts on crucial matters.

The students' confidence received a significant boost through this unique experience, and they gained valuable insights into the workings of Indian democracy and governance.

Their articulate contributions, combined with the expertise of the honorable Governor of Kerala, made for a captivating episode that sparked thoughtful conversations and inspired individuals across the nation.

Vriksharopan: Tree Plantation Drive (July 22, 2023)

"People who will not sustain trees will soon live in a world that will not sustain people."

With this noble aim at heart, the GNIOT Institute of Professional Studies orchestrated an event called "Vriksharopan: Tree Plantation Drive," organized by the dedicated members of the Social Club Prayas. The primary objective was to promote environmental consciousness and actively contribute to creating a greener and healthier campus. The sight was truly heartwarming as all faculty members came together, for a sustainable and verdant campus. Led by Prof. Dr. Savita Mohan, the principal of GIPS, the event resonated with the significance of tree plantation and environmental conservation.

In a world grappling with ecological challenges, initiatives like Vriksharopan assume paramount importance. Such collective efforts demonstrate our commitment to safeguarding our planet for future generations, recognizing that the sustenance of trees ensures the sustenance of humanity itself.

Through events like Vriksharopan, the GNIOT Institute of Professional Studies continues to nurture a culture of environmental stewardship, making significant strides toward a more sustainable future. This noble endeavor serves as a light of inspiration, urging us all to plant the seeds of change and cultivate a world that thrives in harmony with nature.

Digital Entrepreneurship: Challenges and Issues (July 24, 2023)

"Embrace the Digital Horizon: Where Innovation Meets Transformation"

Institutions' Innovation Council (IIC) of GNIOT- Institute of Professional Studies organized a session on "Digital Entrepreneurship: Challenges and Issues".

The guest speaker Mr. Narayan Singh Rao, a highly accomplished serial entrepreneur and esteemed alumnus of IIT Roorkee and IIM Ahmedabad, proved to be a transformative experience for all attendees. Mr. Rao commenced the session by unraveling his personal journey into the world of entrepreneurship, from his humble beginnings in traditional businesses to his trailblazing ventures in the digital sphere. His captivating anecdotes resonated with the audience, demonstrating the power of innovation and the significance of embracing change. The interactive Q&A session proved to be the highlight of the event. The audience eagerly sought his insights on scaling start-ups, identifying growth opportunities, and overcoming specific challenges in their entrepreneurial pursuits.

Mr. Rao's thoughtful responses and candid advice left a lasting impression on the attendees, instilling in them a sense of motivation and clarity in their entrepreneurial journeys. Under the profound guidance of Dr. Savita Mohan (Principal, GIPS), the event instilled a spirit of innovation and determination among all present. She stressed the need for adaptability and continuous learning in today's ever-changing world. Armed with the knowledge and motivation imparted by a true visionary in the field of digital entrepreneurship, attendees departed with the resolve to embrace the challenges of the digital world and embark on their own transformative entrepreneurial journeys. The event culminated with a gracious vote of thanks delivered by the President of the IIC Club Prof. Ashutosh Singh.

The poster is for a session titled "Digital Entrepreneurship Challenges and Issues" organized by the Institution's Innovation Council (IIC) of GNIOT. It features the GIPS logo (GNIOT Institute of Professional Studies) and the GNIOT Group of Institutions logo. The session is scheduled for Monday, 24 July, 2023, starting at 11:00 AM onwards, in Seminar Hall, First Floor, GNIOT. The guest speaker is Narayan Singh Rao, a serial entrepreneur and alumnus of IIT Roorkee and IIM Ahmedabad. The poster also includes the address: Plot No. 7, Knowledge Park II, Greater Noida, Uttar Pradesh 201310, and contact information: www.gniotgroup.edu.in | 1800-274-6969. The poster design includes a central graphic of a person standing on a digital screen with a bar chart and a green arrow pointing upwards, surrounded by smaller icons of people sitting at desks.

VOL 2 ISSUE 6 || JUNE & JULY 2023

FACULTY CORNER

HOUSE OF DEBATE ON WHAT WILL HAPPEN TO THE OLD PARLIAMENT BUILDING

The new parliament building is all set to be inaugurated by PM Modi on May 28. But the question arises what happens to the old Parliament building? The existing building served as independent India's first Parliament. It has been the house of

intense debates, discussions, protests, and emotional conversations. It has witnessed some historic events including the adoption of the constitution. The old building saw the nation being built with a new building ready to take over.

Conserving and rejuvenating the rich heritage of the Parliament Building is a matter of national significance originally called the council house. The old Parliament building housed the imperial legislative council and is considered an icon of India's democratic spirit. It was designed by the British architect Sir Edwin Lutyens and Herbert Baker, which took 6 years to build and was completed in 1927. In March 2021 union housing and urban affairs Minister Hardeep Singh Puri told the Rajya Sabha that once the new building is ready, the existing one would have to be repaired and made available for alternate use, but no comprehensive thought has been given to it.

According to the source, the old building will not be demolished. The existing Parliament building will surely be conserved, as it is an archaeological asset for the country. It will be suitably retrofitted to provide more functional space for parliamentary events and to ensure that it is used along with the new building.

Some reports say the existing parliament building may also be converted into a museum if that will happen the building will surely be opened for the common public to experience the current Lok Sabha and the Rajya Sabha chambers and much more. Whatever decisions will be taken by the government, surely, the old

building is part of India's rich historical past and it should be preserved for generations to come.

Preservation of the Old Building: According to the source, the old Parliament Building will not be demolished. Instead, there is a plan to preserve the existing structure. The decision to preserve it stems from its significance as an archaeological asset for the country. The building likely holds historical and cultural importance, and therefore, the government sees value in maintaining it.

Retrofitting for Functionality: The existing Parliament building is expected to undergo suitable retrofitting. The purpose of this retrofitting is to provide more functional space for parliamentary events. By making necessary modifications, the building can continue to serve its purpose as a place for parliamentary activities and events.

Coexistence with the New Building: Despite the construction of a new Parliament building, the existing one will be retained and used alongside it. This suggests that the government aims to strike a balance between preserving the historical significance of the old building while also embracing modern facilities and accommodations provided by the new building.

In conclusion, we can say that, the old Parliament building will not be demolished but instead preserved and retrofitted to serve as a functional space for parliamentary events. There are also discussions about possibly converting it into a museum, allowing the public to experience its historical significance. The government recognizes the building's importance and believes it should be preserved for the benefit of future generations.

Personal Data Protection Bill and Social Media Regulations in India: Safeguarding Privacy and Ensuring Accountability

India, like many other countries, is grappling with the challenges posed by the rapid digitization of personal information and the influence of social media platforms. In response to these evolving concerns, the Indian government has been wor-

king on two significant legal initiatives: the Personal Data Protection Bill (PDPB) and regulations for social media platforms.

These endeavors aim to strike a balance between safeguarding individual privacy rights and ensuring accountability in the digital realm. Let's delve into the key aspects of these legal developments.

The Personal Data Protection Bill (PDPB):

The PDPB is a comprehensive legislation that seeks to provide a framework for the protection and regulation of personal data in India. Inspired by global privacy frameworks, it aims to address issues related to data privacy, consent, and secure data handling practices. The bill recognizes the rights of individuals over their data and imposes responsibilities on entities that collect, process, or store such data, known as data fiduciaries.

Under the PDPB, data fiduciaries are required to obtain consent from individuals before collecting their personal information and ensure its lawful and fair use. The bill also introduces concepts like the right to be forgotten, empowering individuals to request the erasure of their data under certain circumstances. Additionally, the PDPB establishes a Data Protection Authority responsible for enforcement, oversight, and the resolution of data protection-related issues.

Social Media Regulations:

Social media platforms have become powerful communication tools, but they also raise concerns about data privacy, misinformation, and online abuse. Recognizing the need for greater accountability.

The Indian government introduced the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021.

The guidelines require social media platforms to appoint grievance officers to handle user complaints and establish a robust mechanism for addressing content-related concerns. Platforms must also comply with takedown requests for unlawful or objectionable content within a specified timeframe. Additionally, the rules mandate larger social media platforms to publish periodic compliance reports and implement measures to trace the originators of certain messages to combat misinformation and fake news.

Impact and Criticisms:

The Personal Data Protection Bill and social media regulations have generated mixed reactions. Supporters argue that these measures are crucial for protecting individual privacy, ensuring responsible data handling practices, and promoting a safer digital environment. They believe that these legal frameworks will enhance user trust, foster innovation, and facilitate secure data sharing in a rapidly evolving digital landscape.

Conclusion:

The Personal Data Protection Bill and social media regulations are crucial steps toward safeguarding privacy and ensuring accountability in India's digital ecosystem. As the country grapples with the opportunities and challenges posed by the digital age, these legal initiatives aim to strike a balance between individual rights, data protection, and the responsible use of social media platforms. The evolving landscape of technology and user expectations necessitates ongoing discussions and adaptations to ensure that these legal frameworks effectively address emerging concerns while fostering a secure and inclusive digital environment for all.

WELCOME TO TEAM GIPS

Dr. Akansha Saxena (Assistant Professor – BBA)

Dr. Akansha Saxena, joined as an Assistant Professor in the Department of BBA. She worked at Shri Guru Nanak Girls Degree College, for 7 years, Eram Girls College for one year, and King George Inter College for one year. She has done her Ph. D under the guidance of Prof. Somesh Kr. Shukla. She is B.Com. & M.Com. from the University of Lucknow. Her specialization are Financial Accounting and Cost Accounting. Her core interest areas are Business Organization, Selling & Advertising, and Contemporary Audit.

Mr. Kshitij Dwivedi (Assistant Professor – B.com.)

Mr. Kshitij Dwivedi has joined as Assistant Professor in the department of Commerce. He is B.Com. & M.Com. from CCS University. He is UGC-NET in commerce. His role encompasses developing curriculum, delivering engaging lectures, mentoring students, and actively participating in academic committees. His core interest areas are financial accounting, cost accounting, and corporate accounting subjects.

Ms. Anjali Chawra (Assistant Professor – B.Com.)

MS Anjali Chawra, secured the prestigious UGC NET qualification in commerce four times, and holds a postgraduate degree from the esteemed CCSU, With an enriching journey of two years as an assistant professor. She effortlessly imparted her knowledge and passion. She is an expert in business statistics, auditing, and business finance. Her teaching abilities have left an indelible mark on students, inspiring them to excel and thrive in the world of commerce.

Ms. Dhruwajita Devi (Assistant Professor – BCA)

Ms. Dhruwajita Devi has recently become a part of GIPS in the department of BCA. She is B.Sc. And M.Sc. in Computer Science from Gauhati University. She is also M.Tech. in Information Security. She has an impressive portfolio of publications, including three research papers featured in reputable international journals and an additional three in renowned national journals.

Dr. Vinesh (Assistant Professor – BBA)

Dr. Vinesh has joined the GIPS as an Asst. Prof.in the Department of BBA. She is M.A. in economics, B.Ed., Ph.D. in Commerce & UGC-NET. She has numerous publications in International and national journals. She has numerous publications in International and national journals. Number of paper publications: 6 in International Journal, 1 in National.

Ms. Madhuri Pal (Assistant Professor – BCA)

Ms. Madhuri has join in the department of Commerce. She is MA, M.Com. & UGC-NET. With a wealth of experience, she has been teaching for 4 years as an Assistant Professor. Throughout her career, her key interest areas and specialization lie in Microeconomics, Macroeconomics, and International Economics. She is passionate about imparting knowledge and developing a deeper understanding of these subjects among her students.

STUDENT'S CORNER

Startup India

India is a country that has always been brimming with entrepreneurial spirit. Over the past few years, the government of India has taken several initiatives to boost this spirit and create a favorable environment for startups. One such initiative is the Startup India program launched

in 2016 by Prime Minister Narendra Modi. The program aims to foster entrepreneurship and promote innovation in India..

The Indian government's efforts to promote entrepreneurship through initiatives such as Startup India and Digital India have helped create a conducive environment for startups to grow and flourish. The availability of funding, a large pool of skilled talent, and a growing domestic market have also contributed to the growth of the startup ecosystem.

One of the key drivers of the unicorn revolution in India has been the proliferation of mobile internet and smartphones. The widespread availability of affordable smartphones and low-cost mobile data plans has enabled startups to reach a wider audience and provide access to new services and products.

The rise of unicorns has also attracted significant investments from venture capitalists and private equity firms. The availability of funding has enabled startups to expand rapidly and capture new markets, leading to their unicorn status. In recent years, global investors such as SoftBank, Tiger Global, and Sequoia Capital have been investing heavily in Indian startups, further fueling their growth.

The Indian unicorn revolution has not only created wealth for its founders and investors but has also generated employment opportunities for millions of people. These startups have created thousands of jobs,

and their success has inspired a new generation of entrepreneurs to take the leap and start their ventures.

Another significant factor is the availability of funding. India has seen a surge in venture capital investments in recent years, with investors betting big on the country's burgeoning startup ecosystem. According to data from Tracxn, a startup data platform, Indian startups raised \$9.3 billion in venture capital funding in 2020, despite the COVID-19 pandemic.

One of the most notable unicorn success stories in India is that of Flipkart, an e-commerce platform founded in 2007 by Sachin Bansal and Binny Bansal. In 2018, Flipkart was acquired by Walmart for \$16 billion, making it the largest acquisition of an Indian startup to date. Flipkart's success paved the way for other Indian e-commerce companies like Snapdeal and Paytm Mall to gain traction in the market.

The success of Indian unicorns has also attracted attention from international investors and companies. In 2020, Google announced a \$10 billion investment plan in India over the next five to seven years, focusing on digital infrastructure, technology startups, and other initiatives. Amazon, too, has announced plans to invest \$1 billion in digitizing small and medium-sized businesses in India.

However, the Indian startup ecosystem also faces several challenges, such as regulatory hurdles, lack of infrastructure, and access to talent. The COVID-19 pandemic has also presented new challenges for startups, with many struggling to raise funding and sustain their businesses.

Cloud Seeding - Have Humans Learned to Control the Weather?

Yes, humans indeed learned to control the weather. With the help of cloud seeding, we can artificially rain wherever we want. This is a technology that has been used for many years. A country like China has spent millions of dollars on this technology.

You can use cloud seeding for many self-reasons. For example, if you are afraid that it may rain on the day of your wedding a company in France offers cloud seeding at 100000 dollars.

After hearing the cloud seeding concept a big question that arises in your mind is if this technology is indeed so wonderful, then the water crisis in our country problems like droughts in some places, in other places there may be excess rainfall causing floods, to solve all these problems. Why isn't this technology used? The main answer to this question is we are unable to create clouds by cloud seeding. Cloud seeding is a process by which we can delay rain or speed up the rain.

Cloud seeding was a serendipitous discovery. In 1943, DR Vincent Schaefer was researching aircraft icing and perception and in 1946 he discovered the concept of cloud seeding. He saw the use of dry ice fast forward the process of condensation which is essential for rain.

The most common chemicals used for cloud seeding include silver iodide, potassium iodide, and dry ice (solid carbon dioxide). Liquid propane, which expands into a gas, has also been used. This can produce ice crystals at higher temperatures than silver iodide. After promising research, the use of hygroscopic materials, such as table salt, is becoming more popular.

When cloud seeding, increased snowfall takes place when temperatures within the clouds are between -20 and -7 °C. The introduction of a substance such as silver iodide, which has a crystalline structure similar to that of ice, will induce freezing nucleation.

Cloud seeding refers to the intentional introduction of various substances into clouds to stimulate precipitation, particularly rain or snow. The process was discovered serendipitously by DR Vincent Schaefer in 1946 while he was conducting research on aircraft icing and perception.

Initially, Schaefer was investigating ways to combat aircraft icing, and during his experiments, he observed that the introduction of dry ice (solid carbon dioxide) into the clouds significantly accelerated the process of condensation. Condensation is a crucial step in the formation of raindrops or ice crystals within clouds. By providing nuclei for water vapor to condense onto, cloud seeding facilitates the transformation of water vapor into liquid droplets or ice crystals, ultimately leading to precipitation.

Various substances have been used for cloud seeding, with silver iodide and potassium iodide being among the most common chemicals. These substances possess a crystalline structure that is similar to ice, making them effective as freezing nuclei, initiating the formation of ice crystals in clouds with temperatures ranging from -20 to -7 °C.

Furthermore, hygroscopic materials, such as table salt, are gaining popularity as cloud-seeding agents. These materials have the unique property of absorbing moisture from the air, promoting the growth of cloud droplets and increasing the likelihood of precipitation.

Cloud seeding is typically employed in regions where water resources are scarce or during droughts to induce precipitation and increase water availability. While cloud seeding has shown promising results in certain cases, its effectiveness can vary based on the cloud's natural conditions, atmospheric stability, and other factors. As such, it is considered an area of ongoing research and application.

जीएनआईओटी इंस्टिट्यूट ऑफ प्रोफेशनल स्टडीज में मनाया गया योग दिवस

ग्रेटर नोएडा ॥ जीएनआईओटी इंस्टिट्यूट ऑफ प्रोफेशनल स्टडीज में मनाया गया योग दिवस। योग दिवस समारोह छात्रों, शिक्षकों और कर्मचारियों के बीच शारीरिक और मानसिक कल्याण को बढ़ावा देने के उद्देश्य से आयोजित किया गया था। इस उत्सव ने प्रतिभागियों को विभिन्न योग गतिविधियों में शामिल होने और योग के लाभों के बारे में जानने का अवसर प्रदान किया। कार्यक्रम का उद्घाटन प्राचार्य प्रोफेसर डॉ. सविता मोहन ने किया, जिन्होंने स्वस्थ जीवन शैली को बनाए रखने में योग के महत्व पर एक प्रेरक भाषण दिया। उन्होंने योग को दैनिक दिनचर्या में शामिल करने के लाभों और शारीरिक और मानसिक कल्याण पर इसके सकारात्मक प्रभाव पर जोर दिया।

कार्यक्रम का मुख्य आकर्षण संकाय सदस्यों द्वारा आयोजित योग सत्रों की श्रृंखला थी। लचीलेपन, ताकत और दिमागीपन में सुधार के लिए प्रतिभागियों को विभिन्न आसन और प्राणायाम (साँस लेने के व्यायाम) के माध्यम से निर्देशित किया गया। योग आसन के अलावा, ध्यान और माइंडफुलनेस अभ्यास को कार्यक्रम में शामिल किया गया। प्रतिभागियों को मन को शांत करने, ध्यान केंद्रित करने और आंतरिक शांति पाने की तकनीकों से परिचित कराया गया। सत्र ने व्यक्तियों को आराम करने और तरोताजा होने के लिए एक शांत वातावरण प्रदान किया।

योग दिवस समारोह एक शानदार सफलता थी, जिससे प्रतिभागियों के बीच शारीरिक फिटनेस, मानसिक कल्याण और सांस्कृतिक जागरूकता को बढ़ावा मिला। इस कार्यक्रम ने समुदाय की भावना को बढ़ावा दिया और व्यक्तियों को योग को जीवन शैली के रूप में अपनाने के लिए प्रोत्साहित किया। इस तरह के कार्यक्रमों का आयोजन करके, GIPS एक स्वस्थ और संतुलित शैक्षणिक वातावरण का पोषण करने, व्यक्तियों को शैक्षणिक और व्यक्तिगत रूप से पूर्ण जीवन जीने के लिए सशक्त बनाने के लिए प्रतिबद्ध है।

जीएनआईओटी इंस्टीट्यूट ऑफ प्रोफेशनल स्टडीज के सोशल क्लब 'प्रयास' ने चलाया वृक्षारोपण अभियान

ब्रेटर नोएडा ।। "जो लोग पेड़ों का पालन-पोषण नहीं करेंगे, वे जल्द ही ऐसी दुनिया में रहेंगे जहां लोगों का भरण-पोषण नहीं होगा।" इस नेक उद्देश्य को ध्यान में रखते हुए, जीएनआईओटी इंस्टीट्यूट ऑफ प्रोफेशनल स्टडीज ने सोशल क्लब प्रयास के समर्पित सदस्यों द्वारा "वृक्षारोपण: वृक्षारोपण अभियान" नामक एक कार्यक्रम आयोजित किया। प्राथमिक उद्देश्य पर्यावरणीय जागरूकता को बढ़ावा देना और एक हरा-भरा और स्वस्थ परिसर बनाने में सक्रिय रूप से योगदान देना था। यह दृश्य वास्तव में हृदयस्पर्शी था क्योंकि सभी संकाय सदस्य एक टिकाऊ और हरे-भरे परिसर के लिए एक साथ आए थे। जीआईपीएस की प्रिंसिपल प्रोफेसर डॉ. सविता मोहन के नेतृत्व में यह कार्यक्रम वृक्षारोपण और पर्यावरण संरक्षण के महत्व से गूंज उठा।

पारिस्थितिक चुनौतियों से जूझ रही दुनिया में वृक्षारोपण जैसी पहल अत्यंत महत्वपूर्ण है। इस तरह के सामूहिक प्रयास भावी पीढ़ियों के लिए हमारे ग्रह की सुरक्षा के प्रति हमारी प्रतिबद्धता को प्रदर्शित करते हैं, यह मानते हुए कि पेड़ों का पोषण ही मानवता का पोषण सुनिश्चित करता है।

वृक्षारोपण जैसे आयोजनों के माध्यम से, जीएनआईओटी इंस्टीट्यूट ऑफ प्रोफेशनल स्टडीज पर्यावरणीय प्रबंधन की संस्कृति का पोषण करना जारी रखता है, और अधिक टिकाऊ भविष्य की दिशा में महत्वपूर्ण प्रगति कर रहा है। यह नेक प्रयास प्रेरणा की रोशनी के रूप में कार्य करता है, जो हम सभी से परिवर्तन के बीज बोने और प्रकृति के साथ सद्भाव में पनपने वाली दुनिया बनाने का आग्रह करता है।
